

3-D Peace Pole Instructions

1. Using a scissors, cut out the large shape **on the SOLID LINE only.**
2. When finished cutting out the PEACE POLE shape, fold the tagboard on the dotted lines. It is helpful to hold a ruler securely along the dotted line to assist with folding. (Students may need help lining up the ruler with the dotted line and holding it in place while folding.)
3. Decorate the back side (which will be the outside of the PEACE POLE). See the sample for ideas, or create your own!
4. When all four sides and the top triangles are decorated as desired, tape the first three small tabs on the inside of the adjacent triangular sides, one at a time. It will be necessary to fasten the last small tab by placing a small piece of tape on that outside edge. To complete the 3-dimensional PEACE POLE, tuck the remaining large tab inside and fasten it with 3 or 4 small pieces of tape neatly along the outside edge.

May Peace Prevail On Earth

Que La Paz Prevalzca En La Tierra
